217. Contains Duplicate ⤴

217. Contains Duplicate

Given an integer array nums, return true if any value appears at least twice in the array, and return false if every element is distinct.

Input: nums = [1,2,3,1] Output: true

```
class Solution {
    public boolean containsDuplicate(int[] nums) {
        Set<Integer> values = new HashSet<>();
        for(int i : nums)
        {
            if(!values.add(i)) return true;
        }
        return false;
    }
}
```
